最後に、問題(ウ)に入ります。高校生のケイタが英語の授業でスピーチを行います。スピーチを聞いて、問題(ウ)の指示にしたがって答えなさい。このあと、20秒後に放送が始まりますので、それまで問題(ウ)の指示を読みなさい。[間 20 秒] それでは、始めます。英文は2回放送します。[間 2 秒]

Hi, I'm Keita. I'm going to talk about the things that happened last weekend. I like playing tennis, and I usually practice tennis at school on weekends if it's not rainy. However, last weekend, it was rainy, and I couldn't play tennis. So, on Saturday, I read books at home. And on Sunday, I cooked lunch for my family, and they loved it. It was the food I ate in Okinawa during the school trip. At first, I was sad that I couldn't play tennis, but now I realize I like reading and cooking. The rainy days gave me a chance to do things I didn't usually do. So, my friends, if things you don't like happen, you don't need to be sad. It will be a chance for you to find something new. Thank you.

問6 次の英文は、高校生のカイト (Kaito) が英語の授業で行った人工知能についての発表の原稿です。英文を読んで、あとの(ア)~(ウ)の問いに答えなさい。

Hi, I'm Kaito. Today, I will talk about AI \*devices. We use many kinds of AI devices like \*robots, \*drones, and \*smartphones. AI devices collect a lot of information, remember it, and use it to do work given by humans. I think AI devices can make our lives better. There is still a lot of work AI devices cannot do, but they can do some work to make our lives easier. Through my speech, I want you to learn more about AI devices and to imagine how we can live with them in the future.

I didn't know anything about AI devices before I joined an event about them this summer. It \*was held by Kamome City. At the event, I learned about many kinds of AI devices. I saw a robot that worked like a doctor. When a woman told the robot that she had some problems with her body, it asked her some questions, and gave her \*suggestions to make her feel better. A man from Kamome \*City Office said to me, "Though this robot can work like a doctor, ( ① ). It cannot \*replace a doctor. But there will be more robots working in hospitals in the future." At the event, I started thinking about the ways to make AI devices that can help humans.

After I went to the event, I started to learn more about AI devices. I've learned that AI devices are used in many different ways. For example, AI devices help farmers. Look at this \*graph. It shows the \*changes in the number of farmers in 2010, 2015, and 2020 in Japan and how old they were in each year. The number of farmers became smaller, and the \*percentage of the farmers who were 60 years old and older than 60 years old became larger. And now, AI devices \*are expected to be a great help to farmers.

I went to another event to learn how AI devices actually help farmers. One robot I saw there helped farmers pick tomatoes. The robot has a \*camera on it to collect a lot of information about the tomatoes. It remembers the shapes and \*colors of \*ripe tomatoes and decides when to pick the tomatoes. When it decides to pick the tomatoes, it picks them with its arms. Farmers send the tomatoes that the robot has picked to the stores. At this event, I talked with a farmer who used the \*tomato-picking robot. I asked him, "What do you think about working with the robot?" He said, "I don't think robots and humans can do all of the same work. But ( ② ). Today, robots have become very important. The number of young people who want to be farmers has become smaller, because a farmer's work is hard and needs much experience. If robots can do the hard work for farmers, they will improve farmers' lives. I hope more young people will want to become farmers."

AI devices are used in our lives in many ways. I've learned that it is difficult for us to live without AI devices in today's world. However, we need to remember AI devices are not perfect. AI devices can remember all the information they collect, but ( ③ ). So, we always have to think about effective ways of using them. I hope that more AI devices will be used to help people. AI devices, like the doctor robot and the tomato-picking robot, can improve our lives. So, I want to make AI devices that can work well with humans to make our lives better in the future. That's my dream. Thank you for listening.

Daisuke is a high school student. He is talking with Mr. Green at school.

Mr. Green : Hi, Daisuke. What are you doing ?

Daisuke : I'm looking at this poster. I'm going to join this speech \*contest.

Mr. Green : That's great ! You have one week before the \*deadline. Have you sent the things to take part in the first \*round ?

Daisuke : No, I haven't. I have just got an \*application form and I have decided the topic of my speech.

Mr. Green : Oh, what is the topic of your speech ?

Daisuke : I will talk about Japanese culture. I have already found some interesting books about it and I have read them. I'll write a \*summary of my speech next.

Mr. Green : Well, I think you should write your \*script first. When your script is finished, you can write the summary quickly.

Daisuke : OK. I'll do that. After that, I will practice how to \*gesture during my speech. I think gesturing well is important in an English speech.

Mr. Green : I think that is important, too. But speaking well is more important. So, you should practice speaking English before the voice \*recording. You should practice gesturing after sending the voice recording for the second round.

Daisuke : Thank you. I'll make a list of the things to do for the speech contest now.

Mr. Green : That's good ! Good luck !

**Ms. White:** Hi, Ayumi and Masao. What are you doing?

**Ayumi:** We are talking about the school festival in September. Masao and I are in the cooking club, and our club is going to do something about the future of Japanese rice.

**Ms. White:** Rice? That's interesting. Why are you so interested in rice?

**Masao:** Because we think we should eat more rice. My grandfather \*grows rice in Tohoku and sends his delicious rice to my family every year. He is always happy when my family says we enjoy eating his rice, but he worries about the future of Japanese rice.

**Ms. White:** Oh, why does he worry about it?

**Masao:** He said, "The rice \*consumption in Japan has been \*decreasing a lot because of \*changes in our \*eating habits."

**Ms. White:** Oh, really?

**Masao:** Yes. After I heard that, I used the Internet and found ① this \*graph. It shows the \*amount of rice one person ate in a year in Japan from 1962 to 2020. In 1962, one person ate 118.3 kg of rice. In 2000, one person ate about 55 % of the amount in 1962, and, in 2020, one person ate a smaller amount of rice than in 2000.

**Ayumi:** After Masao showed me this graph, I became interested, too. So we decided to do something about the future of Japanese rice at the school festival. We wanted everyone to become more interested in Japanese rice.

**Ms. White:** Then, what are your ideas?

**Masao:** I joined a \*volunteer activity to grow rice last month. The activity began in May and will finish in August. I've been learning how to grow rice. At the school festival, I want to make a presentation about Japanese rice by using the graph and the pictures I took during my volunteer activity.

**Ms. White:** That's great!

**Ayumi:** Ms. White, look at ② these two graphs. To know what the students in my school like to eat, I asked 40 students, "Which do you like the best, bread, noodles, or rice?" Bread is the most popular among them, and more than 80 % of them like bread or noodles better than rice. Bread and noodles are \*made from \*wheat flour. Then, I started to think about making something by using \*rice flour \*instead of wheat flour.

**Masao:** Ms. White, look at the other graph. I asked the 40 students, “What do you eat for breakfast?” More than 50 % of them eat bread for breakfast. So, our club decided to make rice flour bread. I think eating bread made from rice flour will \*increase rice consumption in Japan.

**Ayumi:** So, our club will talk about Japanese rice in Masao’s presentation and sell rice flour bread at the school festival. We hope everyone will be more interested in Japanese rice and like our rice flour bread.

**Ms. White:** I think that is a very good idea. I can’t wait to listen to Masao’s presentation and eat your rice flour bread !

*One day in September, after the school festival, Ayumi and Masao are talking in the classroom after school. Then, Ms. White talks to them.*

**Ms. White:** Hi, Ayumi and Masao. The rice flour bread was wonderful, and everyone enjoyed Masao’s presentation.

**Masao:** Thank you. After the school festival, I used the Internet and learned more about rice and \*wheat. Japan \*imports about 90% of the wheat it uses. What will happen if enough wheat doesn’t come from foreign countries ?

**Ms. White:** I think bread, noodles, and other food made from wheat flour will become very expensive.

**Ayumi:** But I don’t think Japanese people can  because their eating habits have changed a lot, and many Japanese people eat food made from wheat flour.

**Ms. White:** You may be right. How about rice ?

**Masao:** Oh, we grow enough rice in Japan, and we should eat more rice. Let’s find ways to increase our rice consumption.

**Ayumi:** Let’s do that ! We can create new \*recipes to use rice flour.

**Ms. White:** When your club members cook next time, please let me know !

**Ayumi:** Sure.

## 採点上の注意

### 【問題全般について】

- 中間点は、問 5 以外には設けないこと。
- 疑問点は複数の採点者及び点検者によって判断し、校内で統一すること。

### 【中間点のある記述問題について】

- 問 5 について
  - ・ 正答例以外であっても、与えられた条件をすべて満たし、**得点項目 A** の条件を満たすならば、正答として 5 点を与える。
  - ・ 内容については、中間点を設けないこと。

指定語は bus, goes と know である。

**得点項目 A** Keiko が女性に、公園に行くバスを知っているかを尋ねていると読みとれること。

### [誤答とする場合]

- ・ 文法・語法上の誤りがあるために、英文として成り立っておらず、文全体の内容理解に明らかに支障がある場合。（必要な主語や動詞がない等の文構造上の誤り、語順の誤り等）
- ・ 英文として成り立っているが、文脈に適さない場合。
- ・ 指定語を使用していない場合。
- ・ 語数の条件を満たしていない場合。
- ・ 2 文以上で書かれている場合。

### [減点とする場合]

- ・ 文全体の内容理解に支障がないと判断できるが、文法・語法上の誤り（冠詞に係る誤り等）、指定語を含めた綴り字の誤りや大文字・小文字の誤り、符号（, / . / ? / ! 等）に係る誤り（符号の不適切な使用や脱落）がある場合については、その数にかかわらず 2 点減点とする。したがって、中間点は 3 点となる。
